MEMORANDUM

To: All Users of R:BASE 7.5 for DOS and Windows
From: Product Support and Services Team
Date: Tuesday, September 30 , 2008
Subject: **End of Product Support and End of Life**

R:BASE Technologies, Inc., announces the end of support and end of life of R:BASE software version 7.5 (Windows & DOS).

All users of R:BASE 7.5 and below are encouraged to migrate to R:BASE 7.6 or greater which provides bug fixes and many feature enhancements for R:BASE.

An easy migration and conversion path along with technical documents are available at the Support section of our home page www.rbase.com.

Released on October 21, 2005 (almost 3 years ago), R:BASE 7.5 has undergone hundreds of bug fixes and free product enhancements over the years. During the entire life of R:BASE 7.5 product "25" product updates were released, each including submitted bug fixes and requested enhancements. All of these updates were provided FREE of charge to all registered users of R:BASE 7.5. In addition, complimentary software support along with the re-activation License Key services have also been provided, until today. No such services will be available without an active Software Assurance Plan. Thus, R:BASE 7.5 update packages, and support will no longer be available

Please be advised that there have been two major R:BASE releases, 7.6 and Turbo V-8, available on the market since October of 2006. With the many new enhancements added to R:BASE over recent years, new product updates are available in the form of the R:BASE 7.6 and Turbo V-8 "upgrades".

Please contact the R:BASE Technologies, Inc. Sales Team to inquire about the latest versions of R:BASE at special Step Up (SU) pricing to upgrade from R:BASE 7.5 to R:BASE 7.6.
